

The latent sinfulness list

Out of session, look over the list below and cross out any of the **BOLD** words that you don't recognise. Word clear others that you do recognise but are uncertain about.

In a solo session, with one can per hand, direct your attention to your whole body and say the question **out loud**. If the question reads then find the location of the entity responsible and handle it using the Valence Process.

In the next session it is better to re-check the list from the beginning, but you can just re-check the last reading question if re-checking the whole list becomes tiresome.
