

THE FORERUNNER O/W GPM

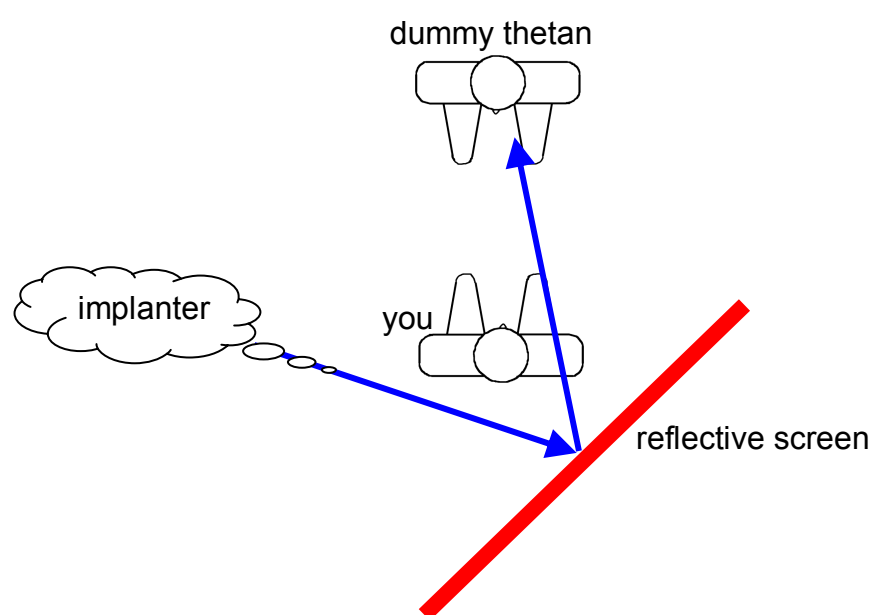

This GPM seeks to install the Overt-Motivator sequence. The main sequence is run twice with the positional setup changed in between to give the idea that first you are doing the implant, and then it is being done to you. The steps are fully itemized.

Say the phrase out aloud, spot the thetan, and say the phrase aloud whilst spotting the thetan. Do these in whichever way most easily produces reads. You can also say aloud ... "During [phrase], spot the thetan."

On the environmental changes, spot the change and spot the thetan to 3 consecutive no-reads.

This is a just pictorial plan representation of the first implant setup.

It is not to be taken too literally and should not be used to invalidate your own recall of the actual setup.

Note how the blue arrow seems to go from you to the "victim".

Note that some lines have both a male form and a (female form). Make sure that both are flattened to 3 consecutive no-reads, although only one of them needs to read in the first place.

Note that each numbered line reads as a phrase on its own. Some lines have been further split from the original, and you may find that these *can* also read on their own, but need not do so.

On the next page, the non-bold phrases are not required to read, but should still be flattened to 3 consecutive no-reads regardless. The bold phrases can read on the first part, the second part, or both.

Spot the environment of the screen, dummy thetan and reflection throughout ...

B They Pretend You Are Being Punished for Your Earlier Overt

This is just a pictorial plan representation of the second implant setup.

It is not to be taken too literally and should not be used to invalidate your own recall of the actual setup.

Note how the blue arrow seems to come from the dummy which they pretend you previously implanted.

Spot the point(s) at which the screens are moved and the implant direction changes.
