

PART O: Clearing Course §4

THE LOWER BANK

The Machine GPM

The format of this GPM is ...

TO BUILD A (*noun-form of verb*) MACHINE
NOT TO (*verb*) YOURSELF

So you will get lines like ...

TO BUILD A *lookingness* MACHINE
NOT TO *look* YOURSELF

The first step is to flatten the 96 verbs on the verb list to either 3 consecutive no-reads or an F/N for each verb. Look up any words on this list you are uncertain of, but just find a suitable definition. Do not try to clear the word to F/N or take it earlier similar.

There are then 96 pairs of lines, as above, which are flattened first individually, then as a pair. Each pair is opposed by a pair 48 pairs away, so that pair 1 is opposed by pair 49. This opposition is most easily seen in the verb list on page 2.

Not all lines have to read, but check suppress, invalidate and protest buttons on any unreading lines. Take the first reading button and get what the pc has to say about it. Do not take the button earlier similar or try to F/N the button. Having taken that charge off the button, recheck the original item and flatten it to either 3 consecutive no-reads or an F/N.

If a line does not read, and **also** does not seem correct, it is ok to fish around for a verb with a similar meaning. Use the verb list on page 2 to help find the correct verb, as the page layout makes the opposing verb at the same horizontal level on the page.

Say the phrase out aloud, spot the thetan, and say the phrase aloud whilst spotting the thetan. Do these in whichever way most easily produces reads.
